CF FREDDY S.T.A.T. MIL™

Simulation Tactical Advanced Trainer

Freddy is a training mannequin used to assist personnel in developing and maintaining perishable skills. Freddy can be utilized in scenario-based training programs or for practice drills with high repetition. The Freddy Training Unit lowers liability during intensive training exercises by reducing instructor and trainee injury.

Freddy is tough: he can handle the abuse of repetitive and rigorous training exercises without ever getting tired, worn out, or hurt. With wrists, arms, elbows, and knees that work similar to a human's, Freddy can be utilized for all types of defensive tactics training. He can be handcuffed, worked with a baton, or taken to the ground. Just as a training partner would, Freddy offers resistance and fights to get back up when taken down.

LET FREDDY TAKE THE BEATING

FREDDY SPECIFICATIONS
