**CONTROLLED F.O.R.C.E. FREDDY S.T.A.T. MIL**

Freddy is a training mannequin used to assist personnel in developing and maintaining perishable skills. Freddy can be utilized in scenario-based training programs or for practice drills with high repetition. The Freddy Training Unit lowers liability during intensive training exercises by reducing instructor and trainee injury. Freddy is tough: he can handle the abuse of repetitive and rigorous training exercises without ever getting tired, worn out, or hurt. With wrists, arms, elbows, and knees that work similar to a human's, Freddy can be utilized for all types of defensive tactics training. He can be handcuffed, worked with a baton, or taken to the ground. Just as a training partner would, Freddy offers resistance and fights to get back up when taken down. CF FREDDY is a highly effective tool for training the Controlled F.O.R.C.E. M.A.C.H.™ Training program.

Freddy stands roughly 6 feet tall and weighs about 100 pounds (suited). He is constructed with heavy gauge steel and is covered with a durable, padded suit. The resistance provided by Freddy's counterweight system feels equivalent to that of a person weighing approximately 180 pounds.

*Helps Maintain Perishable Skills*

*Offers resistance and fights to get back up*

**FREDDY SPECIFICATIONS**

**"LET FREDDY TAKE THE BEATING"**

Controlled F.O.R.C.E.® Freddy is a simulated human figure designed to improve accuracy and performance in defensive tactics training. Here are 6 reasons why Freddy should be in your defensive tactics training program.

1. He can be integrated into any defensive tactics training
2. He lowers liability by reducing instructor injury
3. He never gets tired, worn out, or hurt
4. His wrists, arms, elbows, and knees work like a human's
5. He can be handcuffed, worked with a baton, or taken to the ground
6. Freddy offers resistance and fights to get back up
