NEW METHODS OF HOMELAND DEFENSE

Controlled F.O.R.C.E. Provides Research and Development For Law Enforcement and Military K9 Working Dog Programs

Controlled F.O.R.C.E. is expanding on our dedication to Counter-Terrorism preparation by offering research and development expertise to Law Enforcement and Military K9 Working Dog programs. This new service, **Controlled F.O.R.C.E. Working Dogs**, offers students and clients with K9 training, K9 handler training, and fully tested and certified dogs.

Controlled F.O.R.C.E., a minority woman owned business, brings over 15 years of experience in providing law enforcement, federal, military, and security clients with standardized use of force training programs. We will continue to maintain and deliver our widely recognized standard of training and strive for excellence for all handlers and dogs worldwide.

In order to offer our clients a quality working dog, we have employed an experienced K9 staff and will continue to utilize the strengths of all our subject matter experts. Our goal is to develop the best quality of strong social service dogs specializing in all aspects of patrol work, narcotics detection, and explosives detection working dogs.

Our K9 services will be performed at **Controlled F.O.R.C.E. Proving Grounds**. This facility is dedicated to researching new methods of homeland defense with a focus on improving the quality of canine training and identifying uses for the latest developments in technology.

Controlled F.O.R.C.E. Proving Grounds is our new state-of-the-art facility that gives Controlled F.O.R.C.E. and our partners the capability to perform research, analysis, and R&D related advisory and assistance services. These services encompass development into IED / terrorist attack deterrence and methods to detect explosives in public spaces and transportation networks.

The facility, located in Leland, Illinois, will be hosting a Law Enforcement K9 Working Dog Symposium in early November (date TBA). The goal of this symposium is to bring together K9 trainers to share ideas on a variety of topics, including IED / Bomb Detection, Patrol Officers Working with K9 Units, Apprehension Release Work, and Tactical K9 Deployment with Small Team Tactics, as well as provide solutions to problems that may exist in today's working dogs.

Controlled F.O.R.C.E. continues the fight against terrorism by researching and developing methods for better readiness and improved capabilities to prepare for, protect against, respond to, recover from, and mitigate all hazards including natural disasters and terrorist attacks.
